

Norton Neuroscience Institute Memory Center

Dementia Prevention Clinic

The Norton Neuroscience Institute Dementia Prevention Clinic is for patients interested in learning about their personal risk factors and ways to reduce the risk of developing dementia.

Did you know...

People who have a first degree relative diagnosed with dementia are at a 2x higher risk of developing the disease?

Nearly 40% of dementia cases can be prevented or delayed by following healthy lifestyle choices?

Now seeing patients

If you are interested in learning more about your future risk of developing dementia and ways to reduce your risk, please contact our office to set up a consultation. Patients will be seen at our NNI Brownsboro location.

What to Expect

The Dementia Prevention Clinic is a 2-part visit:

Day 1: Two (2) hour initial consultation with provider to review your personal history/assess risk factors. In depth cognitive assessment will be conducted during visit. Lab work will be ordered if no recent bloodwork within the last year. Optional MRI (cash pricing available).

Day 2: One (1) hour follow up (4 weeks post initial visit) with provider to discuss tailored treatment plan/recommendations.

Kendall Wasz, PA-C

Kendall is trained in Memory Disorders and reducing risk of developing dementia.
