

Norton Children's Pre-admission Testing

Your child will need to complete the pre-admission process, including a COVID-19 swab test, in order to clear them for their upcoming procedure. This is necessary to reduce the risk of infection before your child's procedure. Discuss any special needs with the surgeon before you and your child arrive for testing.

This is a drive-through testing location. Follow these instructions carefully:

- Turn onto Audubon Plaza Drive and head south.
- Turn right into the Norton Respiratory Illness Testing Center, located at 3101 Poplar Level Road, Louisville (the former Walmart Neighborhood Market building)
- Team members and signage on-site will guide you through the process.
- Specially trained pediatric caregivers also will be on-site to address any concerns and make the process as easy as possible for you, your child and the medical staff.
- Stay in your vehicle at all times. The team will come to you to perform the swab test.

After your appointment

- Test results typically are available within three to five days and will go directly to your child's surgeon's office.
- The surgeon's office will call you with the results and explain your next steps.
- You and your child may be instructed to quarantine after the test and prior to surgery.
- If you have any questions, contact your child's surgeon's office directly.
